## EXPERIENCE

**Mindvalley**                                                                 Oct. 2024 – Apr. 2025
*Fullstack Software Engineer*                                          *Kuala Lumpur, Malaysia*
- Developed and maintained critical identity and payment systems using Elixir, Phoenix framework, and Vue 3
- Collaborated with cross-functional teams to develop a new checkout user experience
- Applied comprehensive testing strategies to ensure high code quality and reduce production issues

**GCash (Mynt)**                                                               Mar. 2023 – Oct. 2024
*Lead Software Engineer*                                                               *Taguig, NCR*
- Developed front-end ad solutions on the main app as well as internal tools through Vue and Spring Boot.
- Utilized Docker and Kubernetes for containerization and orchestration, ensuring scalable and efficient deployment of applications.
- Collaborate with cross-functional teams to deliver solutions that align with business objectives.

**Accenture**                                                                  Nov. 2022 – Jan. 2023
*Software Engineer Intern*                                                      *Mandaluyong, NCR*
- Created VBA applications to automate transformation of Excel sheet data to match organization standards.
- Utilized PowerApps, UI/UX Design and Azure to develop internal business product pricing applications

**Creating Info**                                                              Jul. 2022 – Sep. 2022
*Web Development Intern*                                                                *Pasig, NCR*
- Tested user interfaces with Angular, HTML5 and CSS3 using Cypress.
- Troubleshot and debugged code ensuring compatibility with devices and browsers.

## EDUCATION
